

I find me having the proper knowledge and skill set required for this opportunity. I have done one internship in Machine Learning and Artificial Intelligence which has given me proper exposure to the big databases and different algorithms which are widely being used in Machine Learning.

Also, I have made two projects in Machine Learning which has made me capable for tackling different problem statements by analyzing them and working on them.

Also, I can serve my inputs in algorithms, data structures and DBMS.

Also, being a math enthusiast, I have a keen understanding of different statistical tools.

Having knowledge of Data Structure and Algorithm will help solve problems in efficient manner.

Thus, keeping all the above points in mind, I consider myself as the suitable candidate to get selected for this opportunity.
